Engineering + Machinery

**CUSTOM-MADE  
SOLUTIONS**

YOUR PROJECT  
OUR MISSION

# ABOUT US

## COMPANY

CAD is a company that has been on the market for over 30.

We operate with important companies involved in the industrial sector to automate their production processes.

We design custom solutions that are effective and reliable, and we make available all our skills to our customers.

## MISSION

In CAD we do not deal with standard products, but we create unique and efficient solutions.

Thanks to the union of our innumerable skills, we are able to offer to our customers adequate answers to their problems.

We take great care in our work so that the service offered to the customer is fully responsive to the requests received.

## TEAM

CAD sas has always made human capital its strong point.

Our young and close-knit team consists of technicians, designers, programmers, hardware/software engineers, mechanics, electronics specialists, and specialized assemblers. With their expertise and professionalism, they allow us to provide our customers with a quick response and offer them a complete and effective service.

ALL YOU  
NEED

# SERVICES

## INDUSTRIAL AUTOMATION

Custom made machine

Robotic System

Machine tending, on the line  
edges and bottom.

Tailor-made equipment

## FEASIBILITY ANALYSIS

Product check (geometry,  
coupling and tolerance)

Material check

Process check

Quality indices check

ALL YOU  
NEED

# SERVICES

## PLC PROGRAMMING

PLC and HMI software development

PLC brands upon request of the customer

Value Provider **B&R**

Machine Integrator  
**Schneider Electric**

## MACHINES REVAMPING

Mechanical retrofit

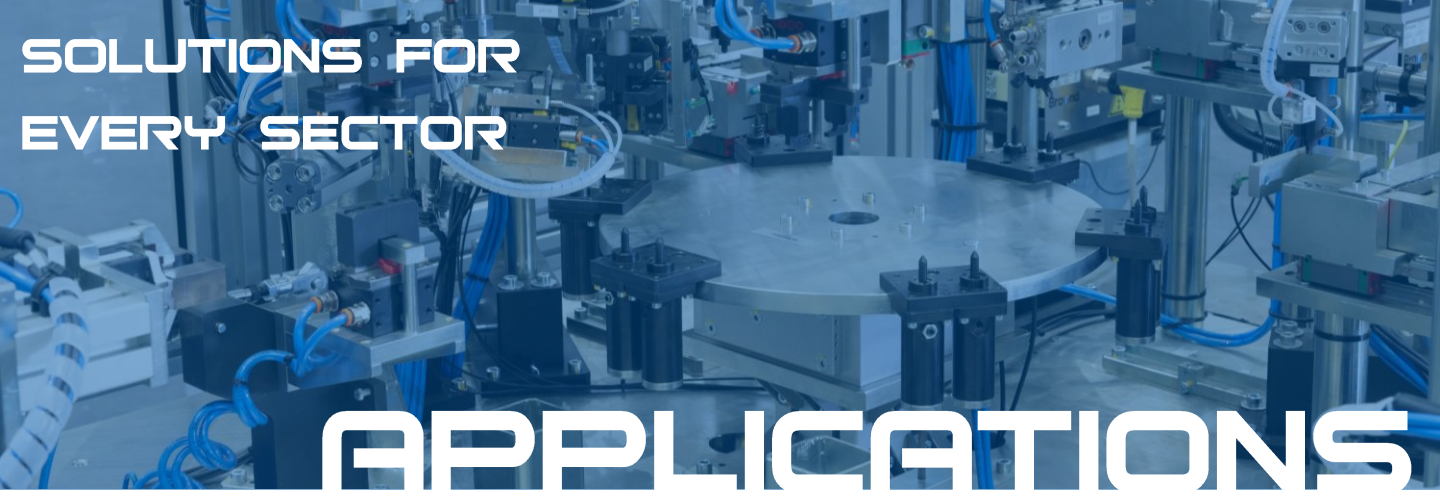

Electrical revamping

Software regeneration

Recertification

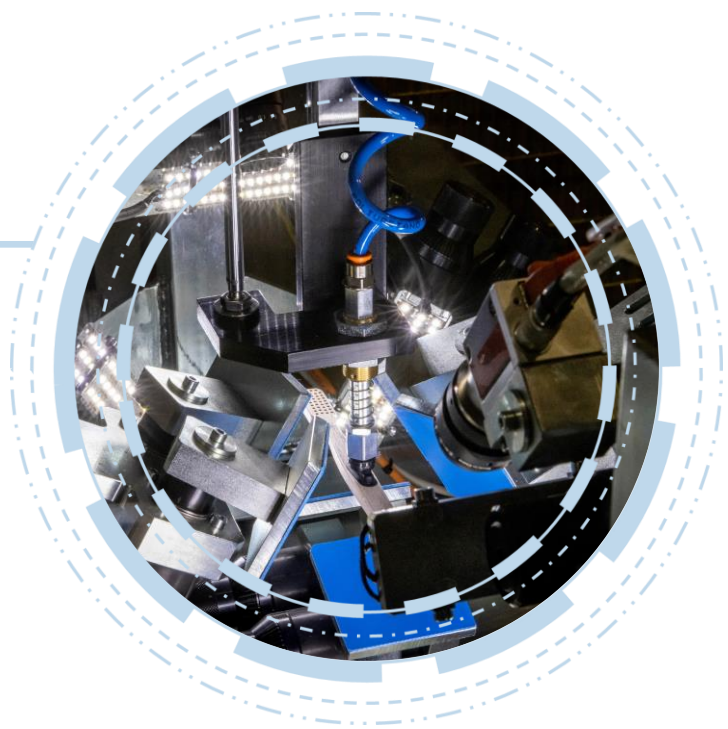

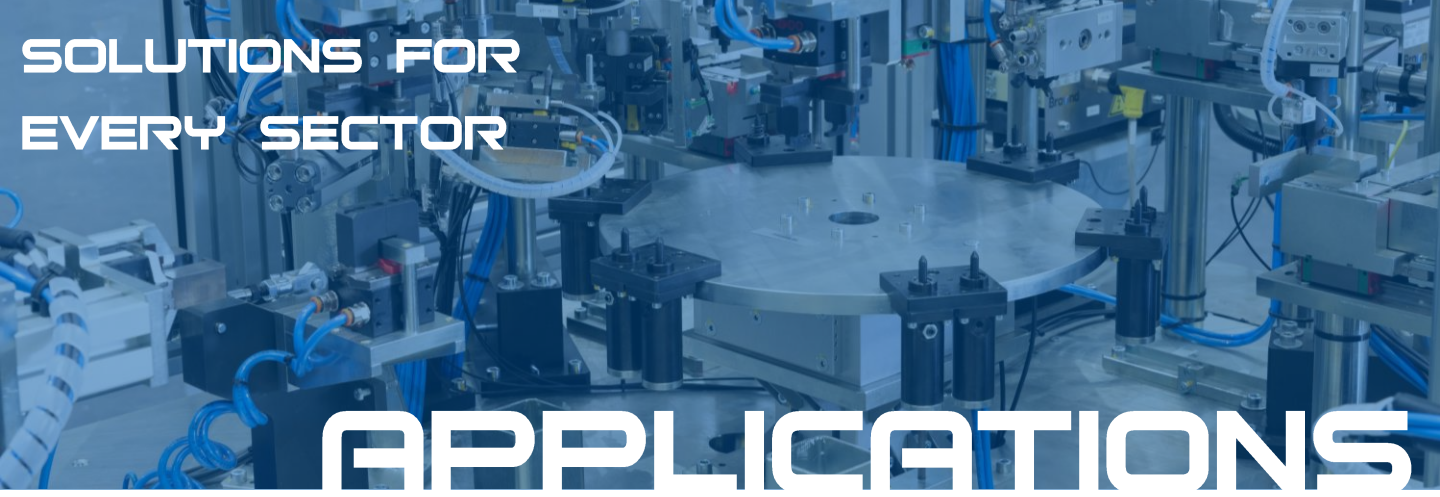

## ASSEMBLY

Insertion groups  
Screwing systems  
Pressing stations

## QUALITY

Vision and measuring  
systems  
Testing systems  
Safety cage

## LOGISTICS

Palletizer

Lines for transporting

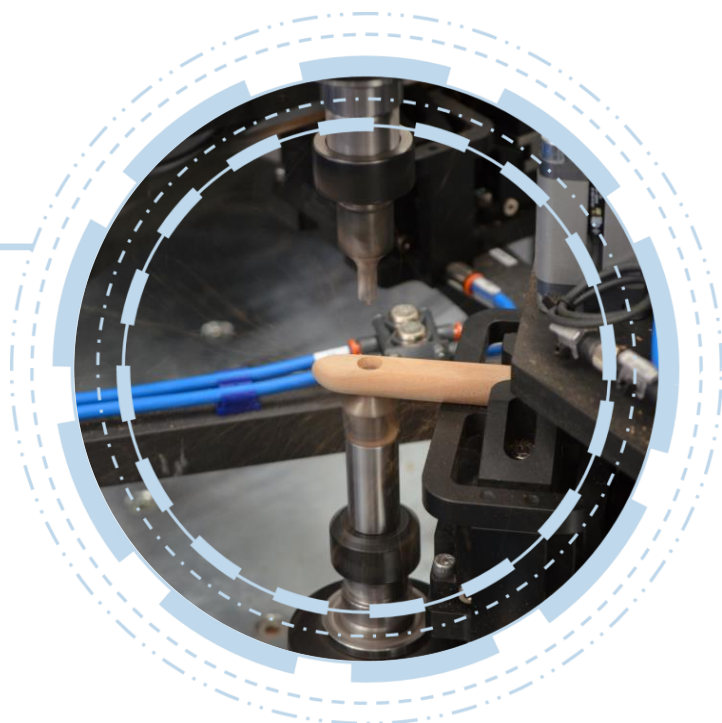

Storage stations

## MATERIAL PROCESSING

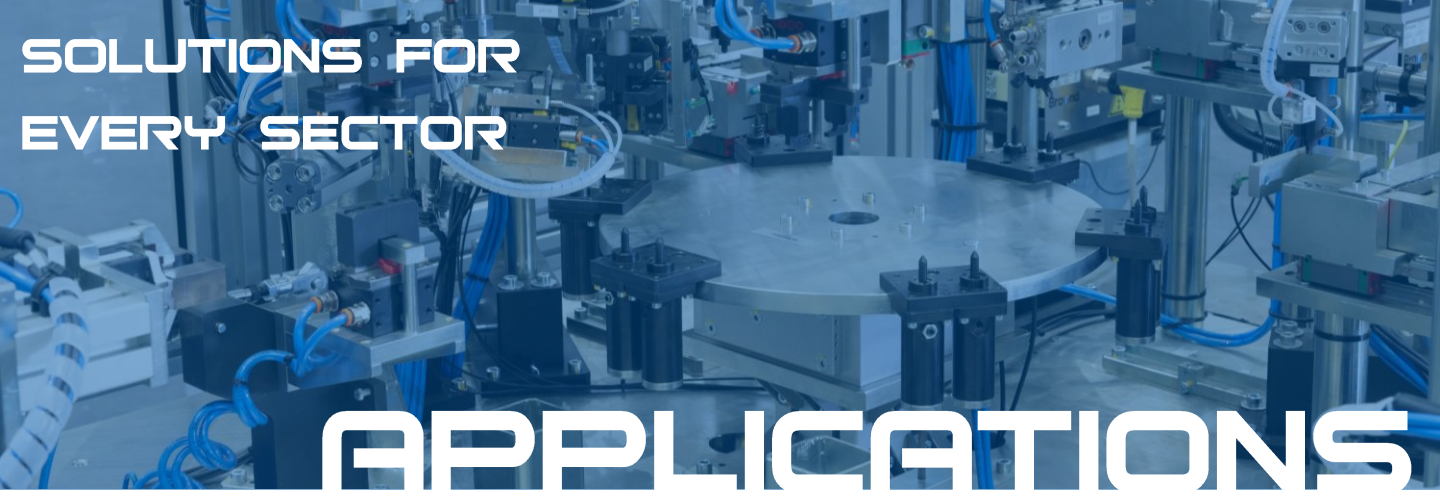

Material cutting

Finishing stations

Drilling systems

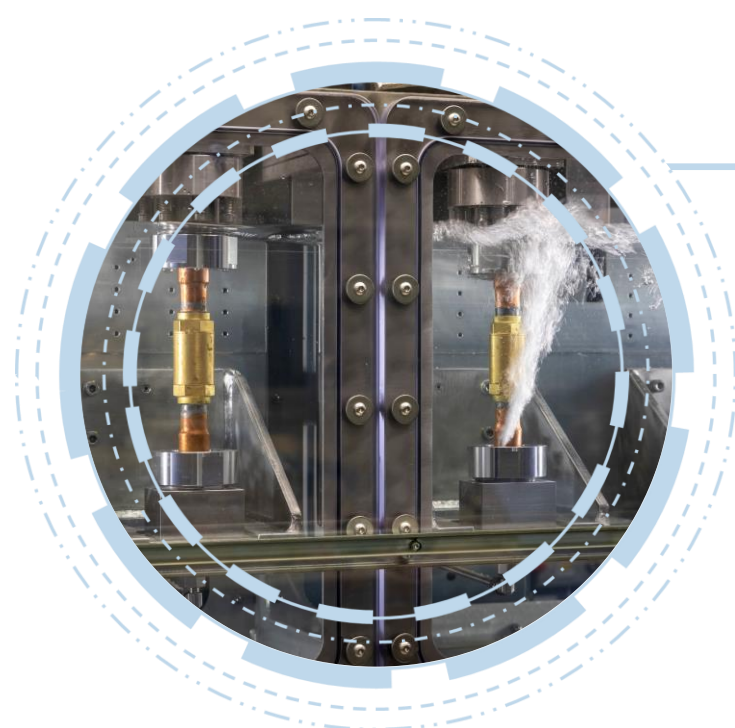

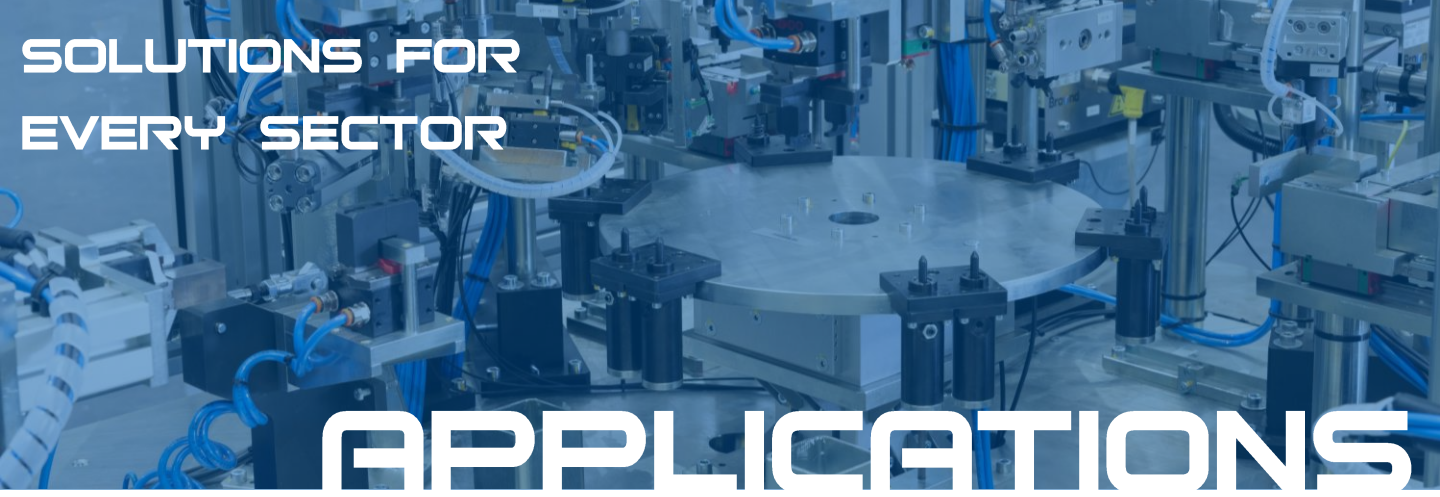

## IMPLEMENTATION

Machine tending  
On the line edges  
Unloading systems

## PACKAGING

Packaging systems  
Labeling  
Laser marking

## **SPECIAL**

Food

Pharmaceutical

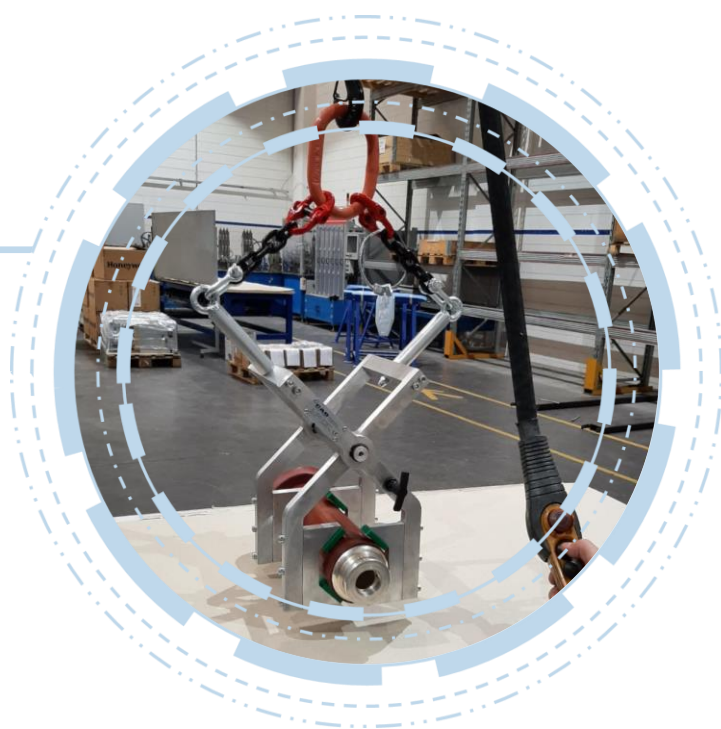

ATEX

## **OPERATOR SUPPORT**

Assembly benches

Carts

Lifting equipment

**WHY  
CHOOSE US**

# ADVANTAGES

## RELIABILITY AND HIGH PERFORMANCE

Each phase of the project is taken care of in detail, starting from the feasibility analysis up to commissioning.

Our machines are checked through special internal tests with care and precision, this guarantees their reliability and high performance over time.

## TECHNOLOGY AND SAFETY

Each of our machines is made in full observance with the Machine Directive.

For each realization we carry out a preliminary analysis on the specific safety standards for the type of plant and we select only the best technologies on the market.

## SERVICES AND CUSTOM MADE SOLUTIONS

Each of our creations comes from the specific needs of our customer.

Thanks to a careful feasibility analysis, each machine is designed in every detail and guarantees the best solution to the proposed high-side challenge

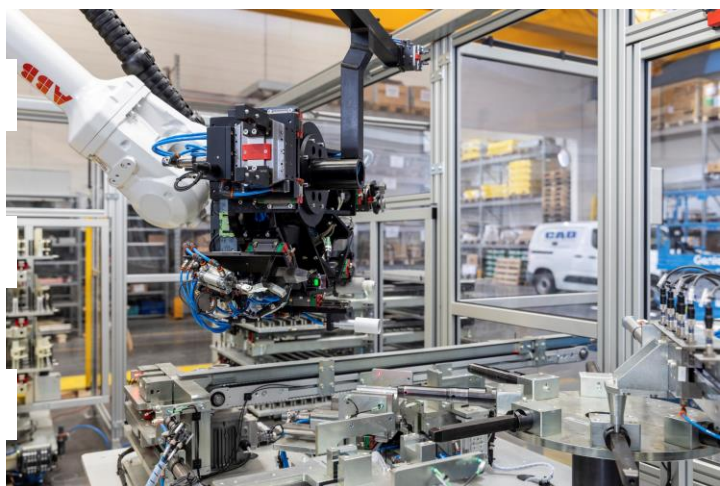

## BY YOUR SIDE FROM START TO FINISH

Feasibility study, product study, design and construction, assembly and testing.

we are always alongside our customers, also providing a complete and efficient assistance and maintenance service.
